## ABOUT ME

I am a passionate and detail-oriented Software Developer with hands-on experience in designing, building, and deploying web applications. Skilled in front-end and back-end development, I enjoy transforming ideas into functional, user-friendly, and scalable solutions. My expertise includes working with HTML, CSS, JavaScript, React, Node.js, and databases, along with version control systems like Git.

I am continuously learning and exploring new technologies to stay up to date with industry trends. I thrive in collaborative environments but can also work independently to solve problems efficiently. My goal is to create impactful software that improves user experience, drives innovation, and adds real business value

## EDUCATION

2022 - 2023 ALX	<b>Software Development</b> I have a foundation in C programming through ALX, where I learned the basics of problem-solving, data types, control structures, and memory management. This experience helped me develop logical thinking and understand the core concepts of how computers execute code, which built a strong base for my journey into software development.
2023 Zaio	<b>Software Development</b> I earned certifications from Zaio in coding fundamentals, HTML, Python, and digital literacy, gaining both technical skills and effective learning strategies for software development.
2025 - 2026 Codetelligence	<b>Software Development</b> Currently pursuing an NQF Level 4 qualification in Software Development at CodeTelligence, where I am building core skills in programming, web development, databases, and problem-solving to prepare for a career in the tech industry.

## EXPERIENCE

2020 - 2023 We Care Wellness Clinic	<b>Graphic Designer</b> Created engaging advertisement and graphic design materials for We Care Wellness Clinic, supporting brand visibility and marketing initiatives through creative visual content.
Current Intern CapaCiti	<b>Digital Associate</b> I am currently an intern at CapaCIT, gaining hands-on experience in software development through practical projects and training. This role allows me to apply programming fundamentals, web technologies, and problem-solving skills while building real-world workplace readiness.

## SKILLS

- |        |              |           |              |
|--------|--------------|-----------|--------------|
| • HTML | • JavaScript | • React   | • Git&GitHub |
| • CSS  | • Python     | • Node.JS | • VS.Code    |
